RSM1 24-Pin Recloser Control Cable

For testing of 24-pin style S&C Scada-Mate sectionalizer controls

The RSM1 24-Pin Recloser Control Cable serves as an accessory to CMC test sets (CMC 356, CMC 256plus, CMC 353, CMC 430) for simple and comprehensive testing of 24-pin style sectionalizer controls such as: [1]

> Beckwith Electric – M-7679

> S&C 5800 Series

> S&C 6800 Series

The RSM1 24-Pin Cable is built with all components necessary to make a direct connection between the device to be tested and the CMC simulating the switch end with all of its currents, voltages, and status signals. For automated testing, free sample test plans for the CMC operating software [2] can be downloaded from our website.

[1] Non-exhaustive list of supported sectionalizer controls
[2] Test Universe PC software; OMICRON Control Center (OCC) required

OMICRON is an international company that works passionately on ideas for making electric power systems safe and reliable. Our pioneering solutions are designed to meet our industry's current and future challenges. We always go the extra mile to empower our customers: we react to their needs, provide extraordinary local support, and share our expertise.

Within the OMICRON group, we research and develop innovative technologies for all fields in electric power systems. When it comes to electrical testing for medium- and high-voltage equipment, protection testing, digital substation testing solutions, and cybersecurity solutions, customers all over the world trust in the accuracy, speed, and quality of our user-friendly solutions.

Founded in 1984, OMICRON draws on their decades of profound expertise in the field of electric power engineering. A dedicated team of more than 900 employees provides solutions with 24/7 support at 25 locations worldwide and serves customers in more than 160 countries.
